Province

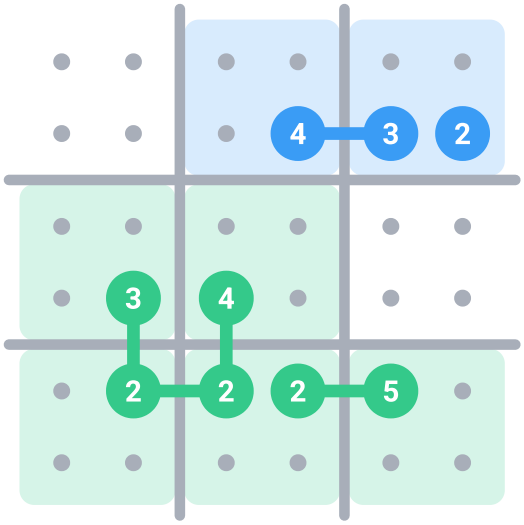

How to play

Goal

Control **5 connected provinces** first (**8** on the big board).

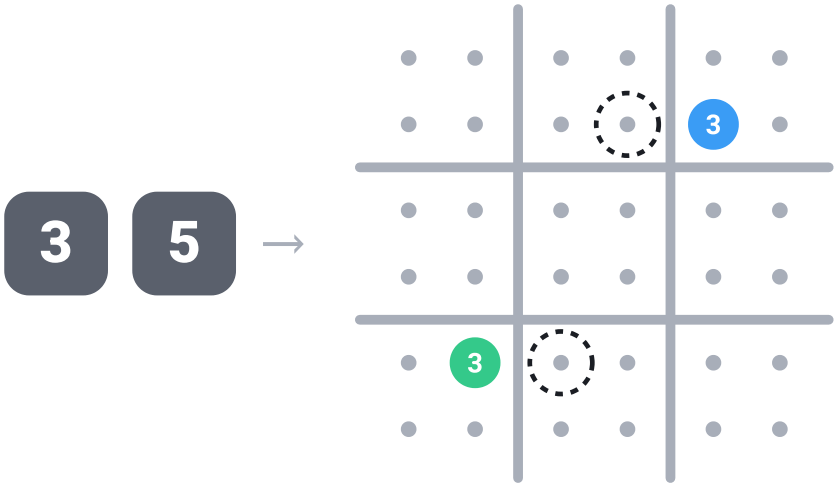

Rivers split the board into provinces of 2×2 squares. A province is yours when **only your soldiers** are in it. Connected means joined by **your bridges**.

- **Green wins**: 5 provinces, joined by green bridges.
- **Blue** has only 2.

You have **36 soldiers** and **8 bridges** for the whole game (big board: 54 and 14).

Your turn

1. Roll the dice: two squares light up. Pick **one**.

2. Not happy? **Re-roll** once. The new roll replaces the old one.

3. Make **one move** on the lit square.

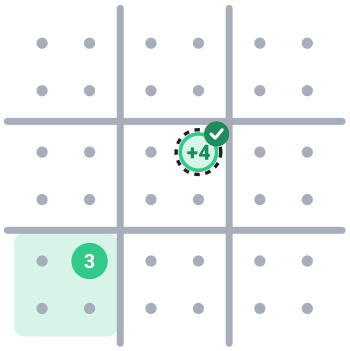

No move possible? Re-roll. Still nothing? Tap **Pass**.

Land

New soldiers from your camp land **only on the lit square**: empty, or your own base.

✓ ALLOWED

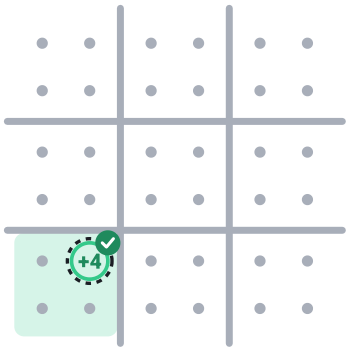

Empty square

Land right on it.

✓ ALLOWED

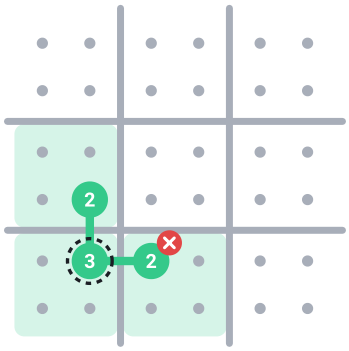

Your own base

Add soldiers to it.

✕ NOT ALLOWED

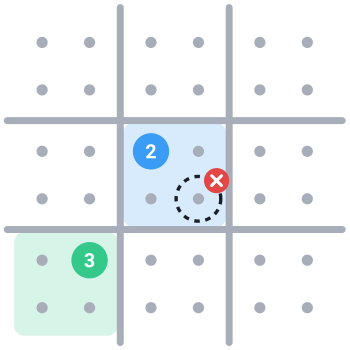

Another base

Only the lit square gets soldiers.

✕ NOT ALLOWED

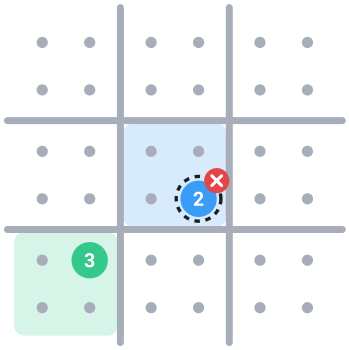

Enemy territory

Blue controls this province.

✕ NOT ALLOWED

Enemy base

Attack it instead.

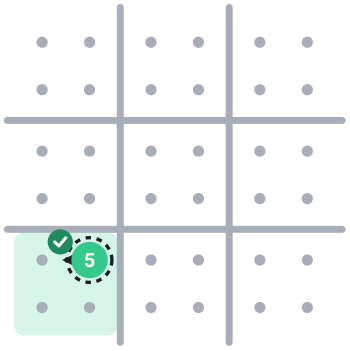

Move

Move any number of soldiers to a **neighbouring square** (not diagonal).

Lit square in **your territory**: use **any** of your bases. Otherwise: only a base touching the lit square.

✓ ALLOWED

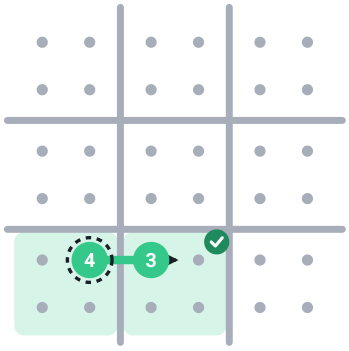

Next to the base

Any number of soldiers.

✓ ALLOWED

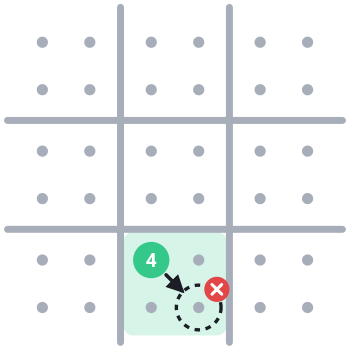

Any base of yours

The lit square is in your territory.

✕ NOT ALLOWED

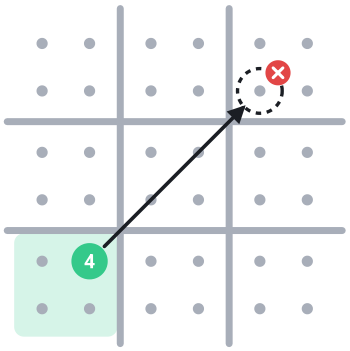

Diagonal

Up, down, left, right only.

✕ NOT ALLOWED

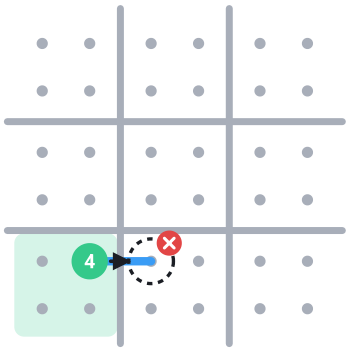

Too far

No base of yours touches it.

✕ NOT ALLOWED

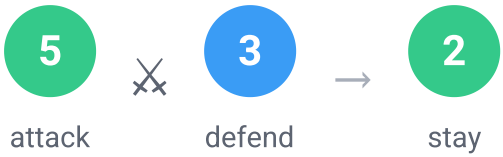

Enemy bridge

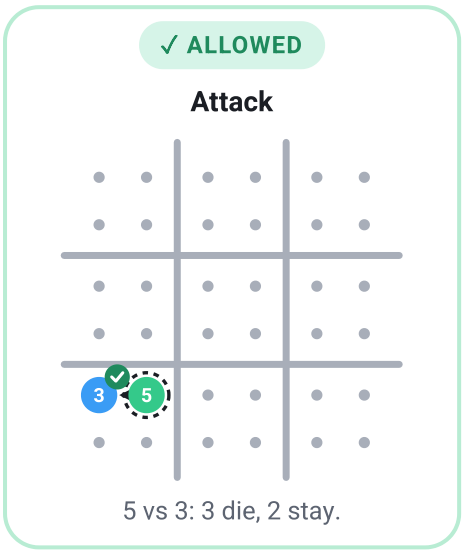

Only its owner can cross.

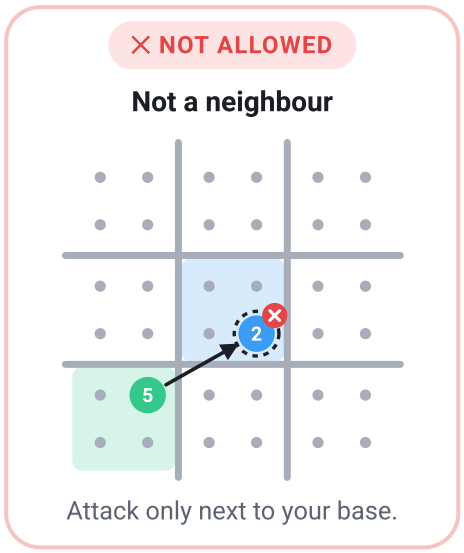

Attack

A move onto enemy soldiers. Each attacker kills **one** defender.

3 defenders **die**.
The other attackers go **back to camp**.

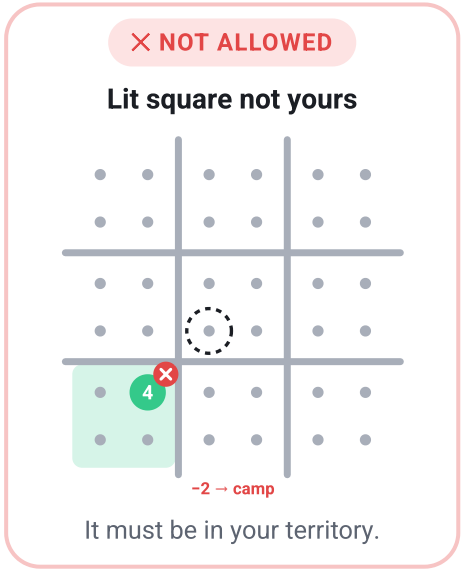

Withdraw

Take soldiers back to camp, from **any base** of your territory.

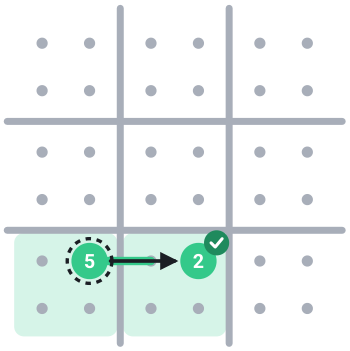

Transport

Send soldiers along a **straight line** through your territory, in one move.

✓ ALLOWED

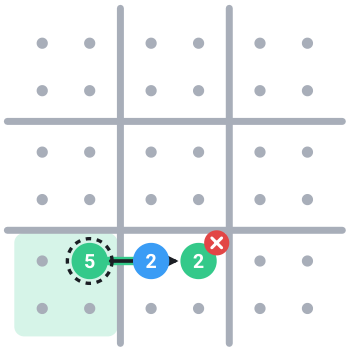

Straight line

Any distance, one move.

✕ NOT ALLOWED

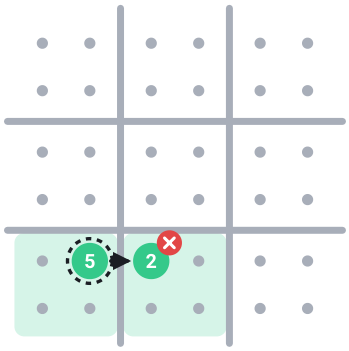

Blocked

An enemy base stops the line.

✕ NOT ALLOWED

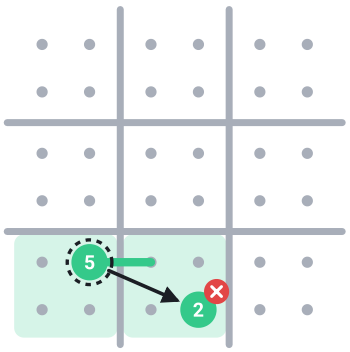

River, no bridge

Transport cannot build one.

✕ NOT ALLOWED

Not straight

No turns, no diagonals.

Bridges

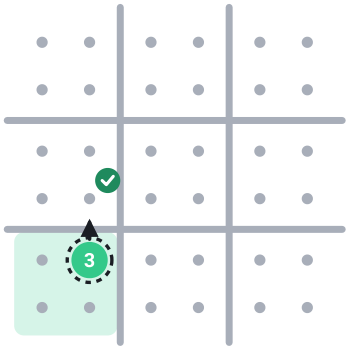

A river can only be crossed on a **bridge**. Only its owner can cross it.

Crossing with no bridge **builds yours**. Your supply is limited.

Building a bridge and moving over it is **one move**.

✓ ALLOWED

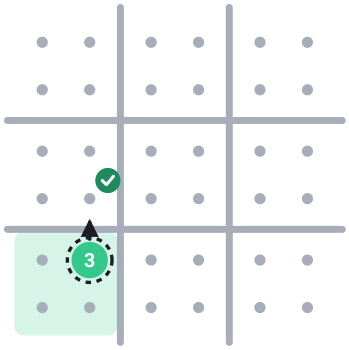

Bridge only

No soldiers move.

✓ ALLOWED

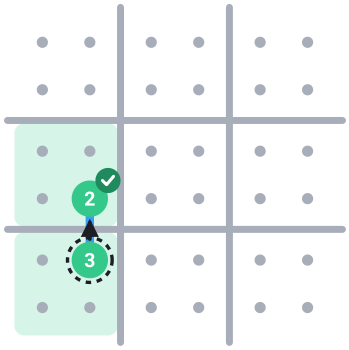

Bridge and move

One move, not two.

✓ ALLOWED

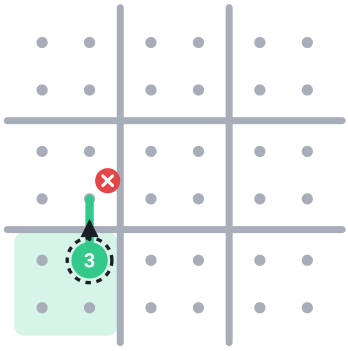

Replace enemy bridge

You hold both ends.

✕ NOT ALLOWED

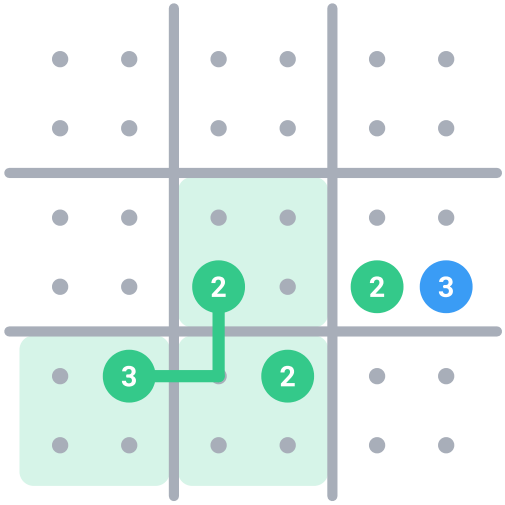

Already there

One bridge per crossing.

Territory

Your bases + the squares of provinces you control, joined by **your bridges**.

Shaded = green territory, even the empty squares.

The right province has both colours: nobody's.

A lit square in your territory lets you play from **any base** in it. You can never land in **enemy** territory. A province with both colours is nobody's.
